

# **HK Group Reflections**

The sixteen-day trip was fantastic. All programmes included both educational and recreational elements. Alton Tower, Cathedrals, the Pud Pie, the city tour...what a variety! I enjoyed it so much! I could feel the excitement on one hand and the relaxing mood on the other; the official meetings were informative, all of which had provided us with more exposure to Wirral's economic, social and political backgrounds. Through interacting with various organization leaders, it'd not only widened our horizon but also provided us with new insights and analytical powers in evaluating problems. Amongst all, the most memorable experience was the time when we met Mr. Mayor, a very kind and noble lady whom I admired so much.

I should thank the Commission on Youth for giving me the opportunity to be a part of this exchange programme. Special thanks to Mrs. Lui, Mr. Cheng, Mr. Ko and Mr. Man for their guidance and support. Many thanks to our beloved hosts, handsome Charles and lovely Karen, our fellow UK delegates: Phil, Nick, Chris, Shahid, Nicky, Lucy, Gina and Anne for their warm hospitality and love. I love you all so much!

Tons of love -- May

Wirral, is a lovely place, giving so much warmth to me. People are kind and treat you as their family member. Their warmth is just like the sun and is full of love. For me, I have the deep impression on them, their love is always in my mind.

Being the youth of Hong Kong, we need to have our mission and extend our horizon, explore the valuable things in other places apart from your country. The International Youth Exchange Programme provides me with a chance to broad my vision. Actually, I benefit from this activity. This is an unforgettable memory. I have learned how to live, communicate and share with the others. For my personal development, this programme gives me the chance to try, observe and face the challenges ahead. Through the trip, my confidence is increased, especially for challenging things that I haven't encountered before.

Learning the culture in another country is important. I have the opportunity to know the characteristics of the culture in another county. Every country has its own culture. Apart from exploring the other's culture, we need to share our culture - Chinese Culture, with others. Therefore, we can let the others know what is the characteristics and life style of our culture.

One more thing, the beautiful scenery is deep in my heart. The air is fresh. I can feel that the place is like the paradise. It gives you comfort and enjoyable life. Also, you
