

# Preface

The International Youth Exchange Programme aims to provide opportunities for youths to widen their horizon and broaden international perspectives. It also renders them chances to exchange ideas and experience foreign culture.

This year, 25 youth delegates were selected to visit Kagoshima in Japan under this programme. During the 8-day programme, youth delegates will be given chances to meet people from all walks of life, including the youth, the elderly, the rich and the poor.

The varieties of exploration certainly fulfilled the objectives of this programme. We understand how insufficient it was when it comes to describe how much we have gained in this programme by delivering this report.

Nevertheless, we still want to share with you the understanding that we gain and the friendship that we share. We hope you will find this report enjoyable to read.
